CommVault Systems, Inc. Analyst Notes

On March 27, 2014, CommVault Systems, Inc. (CommVault) announced that the Scottish Fire and Rescue Service (SFRS), Scotland's front-line emergency-response service, has adopted the CommVault Simpana® 10 software to replace its eight backup solutions and align its data management infrastructure across more than 400 locations. According to CommVault, the software will consolidate multiple backup products into a single platform, centralize data retention, archive and search throughout SFRS. The Company also mentioned that the software will reduce costs and minimize duplication of same services, as mandated by the Scottish Government. Philip van der wilt, VP of EMEA, CommVault, commented, "With an intelligent data management solution now in place, the organisation is able to locate and retrieve emails practically on demand, which is invaluable. We are delighted to have worked so closely with Scottish Fire and Rescue Service to create and deploy such a robust system and encourage them to really test it to its limits - we know Simpana can more than handle it." Synopsys Inc. Analyst Notes

On March 27, 2014, Synopsys Inc. (Synopsys) announced the expansion of its Virtualizer™ Development Kit (VDK) support for Renesas' RH850 MCU with the new RH850/E1x series reference virtual prototype as part of their automotive collaboration. According to the Company, the RH850/E1x series of MCUs will accelerate software development, integration and test of powertrain electronic control units. John Koeter, VP of Marketing for IP and Systems at Synopsys, said, "Synopsys continues to support our customers' innovation of powertrain applications with the availability of the RH850/E1x virtual prototype as part of our VDK portfolio for Renesas' RH850 MCUs. Our VDKs are designed to address the need for earlier software development, integration and test. They are also designed to offer seamless integration with fault and coverage tools to

efficiently develop embedded software for automotive ECUs." The full analyst notes on Synopsys Inc. are available to download free of charge at:

Tyler Technologies, Inc. Analyst Notes

On March 26, 2014, Tyler Technologies, Inc. (Tyler) announced that the city of Corpus Christi in Texas has selected Tyler's Incode® court case management software suite to help streamline municipal court processes online. The Company stated that under the signed agreement, Corpus Christi's obsolete software will be replaced with Incode's wide range of applications to improve court functions. Brett Cate, President of Tyler's Local Government Division, commented, "The Incode investment will reduce paper-driven processes for Corpus Christi, its customers and staff while delivering real-time access to information and online productivity gains. Courts like Corpus Christi and those in similar sized jurisdictions are choosing Incode because our solution is scalable and that flexibility is one reason why more than 750 municipal court clients nationwide have selected Tyler to provide its case management software." PTC Inc. Analyst Notes

On March 31, 2014, PTC Inc. (PTC) announced that it has teamed up with Florida Institute of Technology to form the Center for Lifecycle and Innovation Management by donating PTC software and awarding 20 scholarships for Florida Institute of Technology students. According to the Company, the PTC Windchill® and PTC Creo® software will be used to develop and design new products for the market, the same technology used by 27,000 PTC global manufacturing customers. PTC also added that this donation will be integrated into the management information systems curriculum of the center, thereby providing the students with opportunities to learn and apply practices in an actual environment.
