

Lava Chooses LitePoint for Innovative New Smartphone

Nov 02, 2015 5:00 PM

Lava Pixel V2 to be Calibrated and Verified with the LitePoint IQxstream®

SUNNYVALE, Calif.--(BUSINESS WIRE)-- [LitePoint](#), an award-winning provider of wireless test solutions, announced today that its [IQxstream](#) cellular test platform has been adopted by [Lava International Limited](#), one of the leading and fastest growing Indian mobile handset companies, for testing their latest & innovative [Lava Pixel V2 smartphone](#).

With an in-house R&D and product-testing set-up, Lava has a wide portfolio of [Android smartphones](#) and is now focusing on giving Indian consumers innovative options for LTE-based devices. The Pixel V2 features a quad core processor coupled with 2GB RAM, delivering faster performance and better multitasking between apps. It sports a 13 MP rear camera with dual LED flash and an 8 MP 'selfie' camera with LED flash.

Sanjeev Agarwal, Chief Manufacturing Officer for Lava said, "The multi-device testing capability offered by the IQxstream was extremely important to us because it enabled the highest testing throughput while maintaining the highest test coverage, ensuring quality and the fastest time-to-market."

Richard Hsieh, VP and General Manager of LitePoint Taiwan, Japan and Emerging ASIA said, "As smart device makers get pressed to bring products to market faster than ever and competitive pressure is at an all time high, it's critical that test solutions enable the fastest test times with the highest throughput...without sacrificing test quality. The IQxstream delivers on all of these critical items in a single-box solution that is simple to deploy and simple for operators to use." He added, "We're very pleased to partner with Lava to get the Pixel V2 to market and bring the promise of LTE cellular speed and throughput to the Indian market."
